

**METHOD FOR THE PREPARATION AND EXECUTION OF A SELF-TEST
PROCEDURE AND ASSOCIATED SELF-TEST GENERATING METHOD**

Abstract of the Disclosure

A method is for the preparation and execution
of a self-test procedure to validate the behavior of a
processor model to be tested. The processor model may
5 be a processor or an associated simulator. The method
provides self-test procedures that are immediately
executable by all the models of a processor and that
give OK/ERROR type results that are easy to interpret.
